

Setup NextJS + Typescript 🚀

AGENDA

1. Setup project với create-next-app
2. Push code to Github

1. Setup project với create-next-app

```
npx create-next-app --ts  
# or  
yarn create next-app --typescript
```

Source: <https://nextjs.org/docs/api-reference/create-next-app>

2. Push code to Github

```
# add git remote  
git remote add origin YOUR_REPO_URL  
  
# push code to git repo  
git push -u origin main
```

Quick setup — if you've done this kind of thing before

 Set up in Desktop or  HTTPS  SSH

Get started by [creating a new file](#) or [uploading an existing file](#). We recommend every repository include a [README](#), [LICENSE](#), and [.gitignore](#).

...or create a new repository on the command line

```
echo "# test" >> README.md  
git init  
git add README.md  
git commit -m "first commit"  
git branch -M main  
git remote add origin git@github.com:paulnguyen-mn/test.git  
git push -u origin main
```

...or push an existing repository from the command line

```
git remote add origin git@github.com:paulnguyen-mn/test.git  
git branch -M main  
git push -u origin main
```

...or import code from another repository

You can initialize this repository with code from a Subversion, Mercurial, or TFS project.

[Import code](#)

 **ProTip!** Use the URL for this page when adding GitHub as a remote.

Series - NextJS + Typescript 🎉

- Tác giả: **Hậu Nguyễn**
- Được phát hành trên kênh youtube **Easy Frontend**.
- Tài liệu pdf và videos đều có bản quyền thuộc về Easy Frontend.
- Videos được phát hành cho fan cứng trước, public sau.
- [Đăng ký fan cứng](#) để xem series này đầy đủ và sớm nhất nhé.
